Information Disclosure Statement

1. The information disclosure statement (IDS) submitted on 8/18/2006 has been considered by the examiner.

Allowable Subject Matter

2. Claims 1-38 are allowed.

The following is an examiner's statement of reasons for allowance:

- a. Independent claims 1 and 28 both define features of having plurality of test areas disposed in spaced relation thereon, each of the test areas configured to react with a sample when disposed in contact with the sample and to change color according to an amount of a constituent or property in a sample; a micro-array of imagers disposed within a body, in which each imager is disposed in fixed superposition with a respective one of the indexed test areas, capturing image of said test areas. Such features in combination with other features in claims 1 and 28, which are the broadest allowable claims, are not taught or suggested by the art of record.
- b. Claims 2-26 are dependent upon claim 1.
- c. Claims 29-38 are dependent upon claim 28.
- d. Independent claim 27 defines features of a channel configured for receiving reagent test strip therein, the test strip having a plurality of test pads disposed in spaced relation thereon, each of the test pads configured to react with a sample when disposed in contact with the sample and to change color according to an amount of a constituent or property in the sample; the channel sized and shaped

for forming an indexed fit with the test strip; a micro-array of imagers disposed within a body in fixed superposition with said channel; each of said imagers being superposed with a respective one of the test pads when the test strip is indexed within said channel. These features in combination with other features in claim 27 are not taught or suggested by the art of record.
